I develop distributed services and modular, secure and maintainable applications, with a constant focus on building reliable and useful systems, and a strong interest in evolving toward cybersecurity.

Projects

Transcendence 🌀

Full-stack web application combining user management, an online Pong game and real-time chat, built on a fully containerized backend architecture.

Webserv: Web Server / IRC Server in C++ 🌀

Implementation and understanding of HTTP/TCP protocols and the OSI network model layers.

Cub3D: Ray-casting 3D engine in C 🌀

Real-time first-person 3D rendering engine using ray-casting, with player movement, collision detection, texture mapping and MiniLibX graphics.

Minishell and the Linux Environment

Mini-shell written in C with command and process management, providing a deeper understanding of the Linux environment.

Experience

Computer Science Tutor: Université Paris 8 (2 years)

Supporting undergraduate computer science students in understanding theoretical and practical concepts and explaining complex topics in a clear and simplified way.

Skills

Languages: C C++ Python TypeScript JavaScript SQL

Technologies: Node.js Next.js React Fastify REST API WebSockets Pandas NumPy Matplotlib

Databases: PostgreSQL MariaDB Prisma Redis MySQL

Cloud / DevOps : Docker Docker-compose Nginx HashiCorp Vault Grafana Google-Cloud-Storage

Networking & Protocols: HTTP TCP/IP IRC OSI model

Application Security: OAuth JWT 2FA (OTP/TOTP) ModSecurity

Tools: Vim VSCode Git GitHub Copilot Linux LaTeX

Algorithms: Sorting Algorithms, Graph Traversal (BFS/DFS), Pathfinding, Complexity Analysis, Trigonometry

Soft Skills: Group management, teamwork, communication, active listening

Education

Bachelor's Degree in Computer Science: Université Paris 8, Paris 2018 - 2021

Main courses: programming languages, systems and networks, databases, cybersecurity, software architecture.

42 Paris: 2023 – present (Common Core completed)

Intensive training in programming and software development focused on hands-on projects, collaborative work, peer learning and autonomy.

Certifications and Additional Training

CodingGame: Clash of Code, puzzles, problem-solving and logical thinking.

TryHackMe: Defensive security, offensive security and hacking rooms (CTF).

ISC2: Preparing for the Certified in Cybersecurity (CC) certification.

Languages

French: Native **English:** Technical level
